Brothers and Sisters,

September 01, 2010

Subject: August Shift Survey

Clint and I would like to thank you for participating in the 2010 Shift Survey.

The results listed below give us a clear understanding of what you the membership wants. There have been many comments and suggestions as well which we will look at.

Here are the results:

- 87% are satisfied with their current shifts and do not want change.
- 72% want shifts with stats' maintained.
- 76% are aware of the significance of not reaching an agreement on shifts.
- 69% are not willing to move shift start times by 30 minutes.

We will continue discussions with the company and present new information to you as it becomes available.

In Solidarity,

YYZ Technical Operations, Logistics & Supply Shop Committee
