

PROPOSED LOCAL LODGE 2323 BYLAW AMENDMENT

ARTICLE NUMBER:	XXVI - Usage of Artificial Intelligence (AI)
--------------------	--

ARTICLE AS CURRENTLY WRITTEN:

PROPOSED CHANGE: Create a new article

When utilizing AI tool(s) to generate messages for communication purposes including but not limited to; emails, bulletins, social media, speeches, online chats and campaigning. The sender/publisher must disclose the usage of such tools.

Examples of generative AI tools include but not limited to ChatGPT and Bing Chat.

This disclosure must be done at the earliest point possible within the communication, and will include the following minimum statement written and/or orally;

"AI has been used to partially or fully create this communication."

The sender must ensure all information is factual, legal, and ethical. The sender is not to use anyone's personal information within an AI platform unless you have their written consent.

In addition, generated AI will not be used when factual accuracy or data accuracy is needed. AI will not be used if the content can not be confirmed.

This bylaw is enforceable under Article L of the International Association of Machinists and Aerospace Workers constitution, Improper Conduct of Officers, Representatives and Members.

INTENT OF CHANGE:

The purpose of this by-law is for transparency, and to ensure fair and ethical communications and election processes.
