

More information required

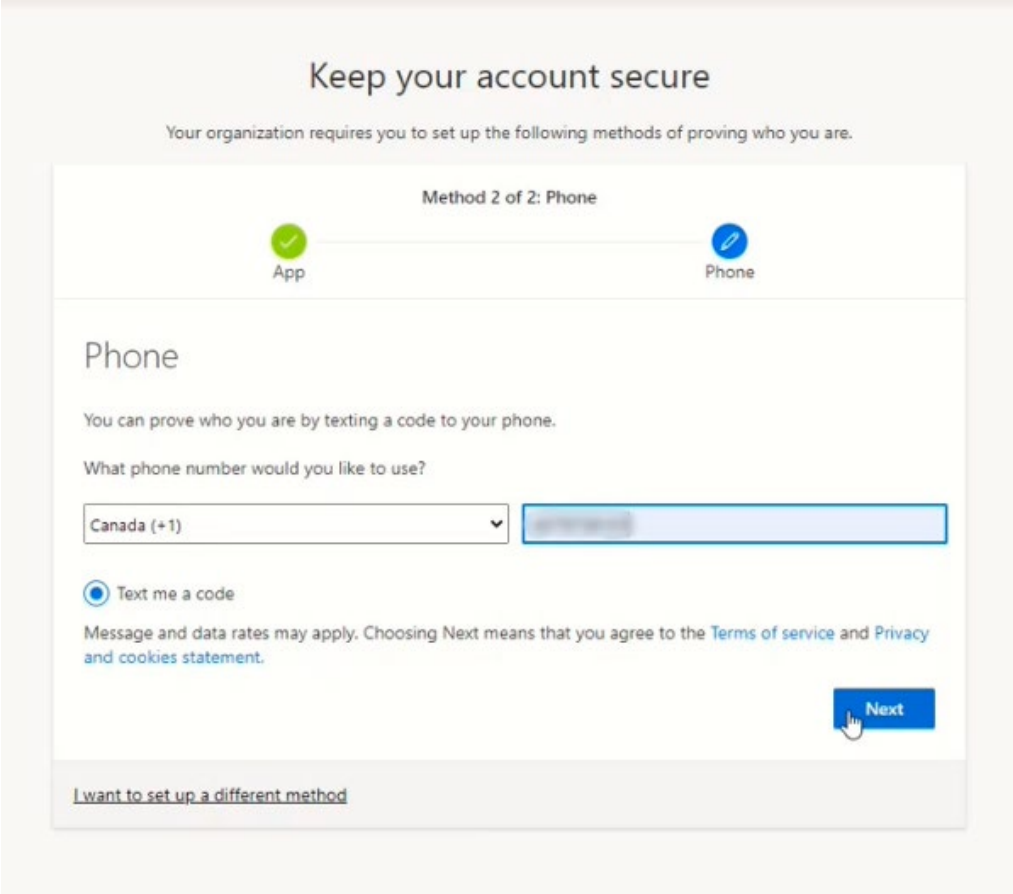

Your organization needs more information to keep your account secure. Before making changes to your security info you must complete multifactor authentication.

[Use a different account](#)

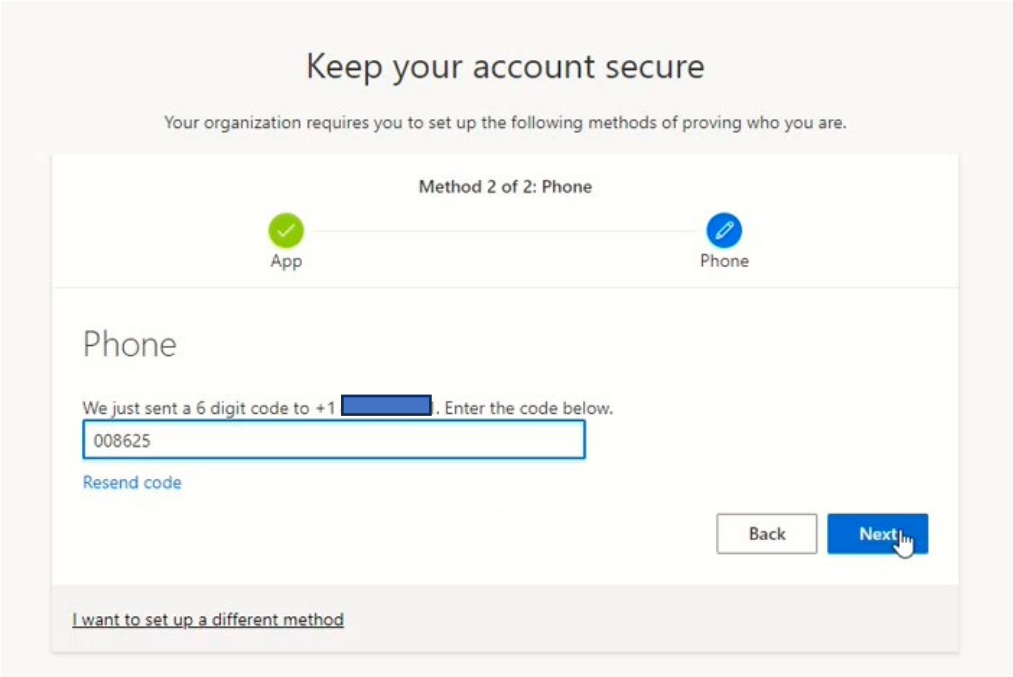

[Learn more](#)

[Next](#)

1. After clicking “next” a screen will appear recommending downloading and setting up MFA on the Microsoft Authenticator app for your smartphone. If you have a smartphone and would like to do so, you can complete your enrollment by clicking “next” and following those steps. (The instructions that follow in this guide are designed for those who would prefer to set up a different method of authentication – in the form of text messages to your phone).
2. Select “I want to set up a different method” and then choose “Phone.”
3. Enter your phone number in the field provided.

4. After receiving a code in a text message on your device, enter it in the field provided.

5. Click next > and again click next and click done(if you see the page saying “The session could not be established” – at bottom there will be an option “To open a new session Please Click here”)
